

Greetings...I am a newly licensed "ham" and I am looking forward to being able to use the frequencies that will be harmed by this proposal...I am totally opposed to this proposal and hope that you will defeat it...This natural resource needs to be protected for both personal use and for emergency use in the homeland arena...I realize folks in the rural areas need internet, but not at the expense of a proven resource that has been in place for years and used by thousands... Thank you for your time, Linda L. Matuschak
